### SO WHAT first video is out!

We have released our first video, where you can see how we support and enhance heat and cold waste recovery, as well as smart and sustainable energy use in Europe.

### Upcoming SO WHAT meeting

Our consortium is gathering again in Constanța, Romania, on April 15 and 16. On the second day, we will host an event open to the public. Stay tuned to our website and social media channels where we will soon share more details!

## SO WHAT hosts meeting, co-creation workshop and panel in Antwerp

The SO WHAT project celebrated its first General Assembly meeting in Antwerp, Belgium, on December 10th.

The session was hosted at the YUST hotel, where the consortium partners assessed the progress of this project, six months after its kick off.

In addition, [Sustainable Innovations Europe](#), with the support of [RINA](#) and [CARTIF](#), organized a co-creation workshop in the evening. During this design thinking session, the consortium members and external guests joined in a dynamic exercise to define the requirements for the tool that SO WHAT is developing.

On the following day, December 11th, some of the partners participated in the [District Heating Workshop in Antwerp](#), where, Nick Purshouse, from [IESVE](#), presented the project's main goals and objectives.

## Report on SO WHAT Industrial Sectors WH/C recovery potential

We've just made public a report assessing the WH/C recovery potential of the SO WHAT industrial sectors.

Check it out and learn more about the methods of Waste Heat & Waste Cold recovery used in different industries and demonstration countries involved in this project and about the barriers to their implementation.

### SO WHAT visits Martini & Rossi's demo site

SO WHAT project partners from [RINA](#) and [Environment Park](#) visited [Martini & Rossi's](#) Pessione plant in Turin, Italy, where all the products of the company, such as Martini, sparkling wines and liquors, are produced.

This industrial site is particularly relevant for the project as many heat and cold recovery options are already in place there. Martini will test and validate the project's tool to analyze those valorisation processes.

### SO WHAT visits ENCE's demo site

Some of SO WHAT consortium members from [CARTIE](#), [FAEN](#) and [ELEUKON](#) visited the [ENCE Pulp Mill](#) in Navia, Spain, one of the project's validation sites, on November 5.

As one of SO WHAT's demo sites, [ENCE](#) will use the project's tool to analyse its manufacturing processes and will benefit from the experience of some consortium partners in Waste Heat valorisation processes.
